Summary — Detail-oriented SQA Engineer experienced in **manual, automation, API, and performance testing** across web and mobile applications. Skilled in creating structured test cases, executing regression suites, and identifying defects within **Agile/Scrum** workflows. Proficient with **Selenium, Playwright, Postman, JMeter, Jira**, and modern QA practices to enhance product quality, reliability, and overall user experience.

Education

B.Sc. in Computer Science and Engineering

2021-2025, 3.84/4.00

Green University of Bangladesh

Work Experience

Join Venture AI

July 2025 – Present

Jr. SQA Engineer

- Executed **manual and automated** test suites for multiple web and mobile applications using **Playwright and Selenium**, improving release quality and reducing post-deployment defects; designed and executed structured test cases covering functional, regression, and cross-platform scenarios.
- Performed API testing using **Postman** and conducted performance testing with **JMeter** to validate system stability, identifying critical **UI/UX, performance, and functional** issues to ensure alignment with business requirements.
- Analyzed business requirements and technical specifications with senior team members and sales teams, converting them into clear, detailed test cases and test documentation.
- Collaborated closely with developers during **Agile sprints** to detect defects early, ensure timely resolution, and maintain overall product quality throughout the development lifecycle.

QA Harbor Limited

March 2025 – June 2025

SQA Intern

- Contributed to QA processes by testing web and mobile applications using **SDLC and STLC** methodologies, preparing and executing detailed test scenarios to validate system behavior and functionality.
- Supported automation setup with **Selenium** to expand test coverage and improve efficiency, while participating in security testing activities to ensure application safety and compliance.
- Collaborated effectively in **Agile** environments to maintain system reliability, identify improvement areas, and drive continuous product enhancement.

Skills

Technical Skills

- **Testing:** Manual, Automation, Functional, Regression, Smoke, API, Performance
- **Automation Tools:** Playwright, Selenium WebDriver
- **API & Performance Tools:** Postman, Apache Jmeter
- **Test Management / Bug Tracking:** Jira
- **Programming Languages:** Java, Python, C/C++
- **Backend:** MySQL
- **IDEs / Dev Tools:** Visual Studio Code, IntelliJ IDEs
- **Version Control:** Git, GitHub
- **Operating Systems:** Linux (Ubuntu), Windows, MacOS
- **Productivity Tools:** MS Office (Word, Excel, PowerPoint), LibreOffice, Adobe (Photo Shop, Light Room), Canva
- **Others:** Agile, Scrum, SDLC, STLC, CI/CD (basic)

Soft Skills

Problem-Solving • Communication • Team Collaboration • Critical Thinking • Leadership • Time Management

Language Skills

- **English:** Proficient (Written and Spoken)
- **Bengali:** Native Speaker

Projects

Advantage Shopping Test Suite

 Bug Report  Github Link

- Performed both manual and automated testing for the Advantage Shopping web application using Playwright with Python. Designed and executed test cases to validate functionality, identify bugs, and ensure cross-browser compatibility.

- ## Extracurricular Activities

Student Mentor, Department of CSE

Green University of Bangladesh

January 2023 - December 2024

- Student Mentor Advisor, Department of CSE**

Green University of Bangladesh

January 2025 - June 2025

- Chair, IEEE Computer Society Student Branch Chapter GUB**

Green University of Bangladesh

March 2024 - May 2025

- Vice Chair (Technical), IEEE Student Branch Chapter GUB**

Green University of Bangladesh

March 2024 - May 2025

- Member, Green University Computer Club**

Green University of Bangladesh

July 2021 - June 2025

- Participated in various workshops and hackathons, collaborating on team-based projects to build practical tech solutions.
